

Ranger Towing Selector

- These charts – divided by transmission type – can be used to locate the vehicle’s GCWR and trailer weight with a variety of engine/axle ratio combinations.
- The GCWR column shows the maximum allowable combined weight of vehicle, trailer, and cargo (including passengers)

- Maximum loaded trailer weight assumes a towing vehicle with mandatory options, no cargo, and a driver (68 kg/150 lb.) only. The weight of additional options, passengers, and cargo must be deducted from this weight.
- Consult an up-to-date Order Guide for Trailer Towing Package option details and content.

¹ Ranger SPORT only.

Note: Trailer tongue load weight should be 10-15% of total loaded trailer weight. Make sure vehicle payload (reduced by option weight) will accommodate tongue load weight and weight of passengers and cargo added to towing vehicle. Addition of trailer tongue load weight and weight of passengers and cargo cannot cause vehicle weights to exceed the rear GAWR (Gross Axle Weight Rating) or GVWR (Gross Vehicle Weight Rating). These ratings can be found on the vehicle Safety Compliance Certification Label.

Frontal Area Considerations
